

NAVANEETH L

FULL-STACK SOFTWARE ENGINEER

Location: Bengaluru, India | Phone: +91 8438472565 | Email: navaneeth.softwareengineer@gmail.com | LinkedIn: linkedin.com/in/navaneethl

PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer with **3+ years of experience** specializing in the **MERN stack**, event-driven microservices, and modern cloud architecture. Proven track record of orchestrating complex monolith-to-microservices migrations, reducing system latency by 40%, and seamlessly integrating Generative AI features into production environments. Passionate about transforming challenging business requirements into high-performance, resilient, and scalable technical solutions.

SKILLS

Core Stack: JavaScript (ES6+), TypeScript, Node.js, React.js

Database: MongoDB, PostgreSQL, MySQL, Redis

Messaging: Kafka, RabbitMQ, Redis Pub/Sub

State & APIs: Redux Toolkit, Context API, RESTful APIs

DevOps: Docker, AWS (S3, EC2), CI/CD, Git

UI / UX: Material UI, Ant Design, SCSS, React Flow

WORK HISTORY

Associate Software Developer

June 2025 - March 2026

TOPGREP, Bengaluru — Project: AIVAGAM

Stack: React, TypeScript, Node.js, Redis, Kafka, Docker, AWS

- Architected an AI-driven e-learning platform utilizing **React.js**, **Node.js**, and **MongoDB**, successfully supporting multi-role access and scalable interactive coding environments.
- Orchestrated the architectural migration from a legacy **monolithic** system to a decoupled **microservices** infrastructure, leveraging **Kafka** for robust inter-service messaging.
- Spearheaded **Third-Party API Integrations** (Generative AI: Gemini/OpenAI), delivering real-time coding assistance and adaptive learning features to end-users.
- Designed and secured **RESTful APIs** with **JWT authentication** and Role-Based Access Control (RBAC), ensuring strict data privacy and system compliance.

Software Engineer

October 2022 - January 2025

SCENAI DATA SCIENCE, Bengaluru — TARVAH & ORBIT

Stack: React.js, Node.js, Docker, Redis, RabbitMQ, Kafka, MySQL, MongoDB

- Engineered highly available **microservices** and REST APIs, cutting front-end response latency by 40% and improving overall system reliability for 200+ users.
- Optimized database query performance and slashed application load times by 25% through strategic **Redis caching** and **MongoDB** indexing.
- Architected high-throughput data pipelines using **Kafka** and **RabbitMQ** for asynchronous messaging, accelerating data delivery speeds by 40% with 99.9% integrity.
- Developed a Node.js-based "Virtual Data Mart" microservice, streamlining cross-dataset accessibility by 30% for business intelligence teams.

NodeJS Trainee

May 2022 - August 2022

App Innovation Technologies, Coimbatore

Stack: Node.js, React.js, ANT Design, TypeScript, MongoDB

- Enforced strict type safety across the frontend by migrating core modules to **TypeScript**, reducing production runtime errors by 40%.
- Built responsive, reusable UI components utilizing **React.js** and **Ant Design**, accelerating frontend development cycles and boosting user retention by 15%.
- Optimized complex **MongoDB** aggregation pipelines, achieving a 30% performance gain in database query execution and API response times.

EDUCATION

Master of Computer Applications (MCA)

PSG College of Arts and Science

2022

Score: **84%**

B.Sc Physics

Tiruvalluvar University

2019

Score: **67%**

CERTIFICATIONS

• React - The Complete Guide (Udemy)

• Modern React with Redux
